

# Strategic Partnership for Floating Offshore Wind

Advancing scalable FOWT  
solutions together

# Three experts – one shared vision

Offshore & Naval Engineering

Foundation Design & Project  
Management

Turbine Tech & System  
Optimization

Together we offer complete  
engineering and advisory services for  
the floating wind sector.

# Why Floating Offshore Wind?

- ✓ Unlocks deep water sites
- ✓ Expands global wind potential
- ✓ Enables large-scale clean energy deployment

# **Integrated. Innovative. Technology- Agnostic.**

Our joint approach focuses on cost-efficient, reliable floating foundation designs – tailored to project needs, site conditions, and client goals.

# Value for Developers & Engineers

Early-stage planning support

Foundation concept development

Risk-informed project execution

End-to-end advisory

Owner's Engineering

# Planning a floating wind project?

We're ready to support your team –  
from early concept to detailed design  
and execution.
